Contents for Volume 137

Number 1, 7 March 1989

WALLRAFF, H. G., Simulated Navigation Based on Unreliable Sources of Information (Models on Pigeon Homing. Part 1) 1

NOWAK, M. and SIGMUND, K., Oscillations in the Evolution of Reciprocity 21

SÜHNEL, J. and VECKENSTEDT, A., Modeling Survival of Experimentally Virus-infected Laboratory Animals 27

HICKEY, D. A., BENKEL, B. F. and ABUKASHAWA, S. M., A General Model for the Evolution of Nuclear pre-mRNA Introns 41

MENDZ, G. L., BULLIMAN, B. T., JAMES, N. L. and KUCHEL, P. W., Magnetic Potential and Field Gradients of a Model Cell 55

MIKLAVIC, S. J. and NINHAM, B. W., Conformation of Surface Bound Polyelectrolytes: I. Implications for Cell Electrophoresis 71

BRITTON, N. F. and SKEVINGTON, S. M., A Mathematical Model of the Gate Control Theory of Pain 91

STOCKERT, J. C., An Intercalative and Minor Groove Binding Model for the DNA Cleavage Reagent, Copper(I) (1,10-Phenanthroline)$_2$ . . 107

HERNANDEZ, J., FISCHBARG, J. and LIEBOVITCH, L. S., Kinetic Model of the Effects of Electrogenic Enzymes on the Membrane Potential . . 113

Number 2, 21 March 1989

MINI REVIEW

NAGORCKA, B. N., Wavelike Isomorphic Prepatterns in Development . 127

OMOTO, C. K., Mechanochemical Coupling in Eukaryotic Flagella . . 163

BERGMAN, D. A. and WINZOR, D. J., Space-filling Effects of Inert Solutes as Probes for the Detection and Study of Substrate-mediated Conformational Changes by Enzyme Kinetics: Theoretical Considerations . . . 171

KHANIN, M. A. and BUKHAROV, I. B., A Mathematical Model of the Exercise Functional State of the Oxygen Transport System 191

SMELLER, L. and GYÖRGYI, S., A Statistical Mechanical Model of the Pre- and Subtransitions of Lecithin Membranes 203

CUMMINGS, F. W., On Surface Geometry Coupled to Morphogen . . 215

GARFINKEL, D., Constraint Matching as a Means of Designing Biochemical Experiments in Multi-Enzyme Systems 221

GARDNER, R. and MORRIS, M. R., The Evolution of Bluffing in Animal Contests: an ESS Approach 235

Number 3, 6 April 1989

FINDLAY, C. S., HANSELL, R. I. C. and LUMSDEN, C. J., Behavioral Evolution and Biocultural Games: Oblique and Horizontal Cultural Transmission 245

GOLDWASSER, L., MAINI, P. K. and MURRAY, J. D., Splitting of Cell Clusters and Bifurcation of Bryozoan Branches 271

BODNAR, J. W., JONES, G. S. and ELLIS, JR., C. H., The Domain Model for Eukaryotic DNA Organization 2: A Molecular Basis for Constraints on Development and Evolution 281

PAWLOWSKI, P. and FIKUS, M., Bioelectrorheological Model of the Cell 1. Analysis of Stresses and Deformations 321

STOCKBRIDGE, N., Theoretical Response of a Bifurcating Axon with a Locally Altered Axial Resistivity 339

HSU, J.-P. and TSENG, S., Estimating the Adjustable Parameters of the Double Michaelis–Menten Model 355

Number 4, 20 April 1989

FIKUS, M. and PAWLOWSKI, P., Bioelectrorheological Model of the Cell. 2. Analysis of Creep and its Experimental Verification . . . 365

NOWAK, M. and SCHUSTER, P., Error Thresholds of Replication in Finite Populations Mutation Frequencies and the Onset of Muller's Ratchet 375

MCNAIR, J. N., Stability Effects of a Juvenile Period in Age-structured Populations 397

ACERENZA, L., SAURO, H. M. and KACSER, H., Control Analysis of Time-dependent Metabolic Systems 423

MITTWOCH, U., Sex Differentiation in Mammals and Tempo of Growth: Probabilities vs. Switches 445

MCNAMARA, J. M. and HOUSTON, A. I., State-dependent Contests for Food 457

STONE, M., Isobolic Determination of "Ratio-Linear" Parameters in Pharmacological Stimulus–Response Models 481

Index to Volume 137

ABUKASHAWA, S. M. (see HICKEY, D. A.), 41
ACERENZA, L., SAURO, H. M. and KACSER, H., Control analysis of time-dependent metabolic systems, 423
Age-structured populations, stability effects of a juvenile period in, 397
Animal contests, the evolution of bluffing in; an ESS approach, 235
Animals, laboratory, virus-infected, modeling survival of, 27
Axon, bifurcating, with a locally altered axial resistivity, theoretical response of, 339

BENKEL, B. F. (see HICKEY, D. A.), 41
BERGMAN, D. A. and WINZOR, D. J., Space-filling effects of inert solutes as probes for the detection and study of substrate-mediated conformational changes by enzyme kinetics: theoretical considerations, 171
Behavioral evolution and biocultural games: oblique and horizontal cultural transmission, 245
Bifurcating axon with a locally altered axial resistivity, theoretical response of, 339
Bifurcation of bryozoan branches and splitting of cell clusters, 271
Biochemical experiments in multi-enzyme systems, constraint matching in design of, 221
Biocultural games and behavioral evolution: oblique and horizontal cultural transmission, 245
Bioelectrorheological model of the cell: analysis of stresses and deformations, 321
Bioelectrorheological model of the cell; analysis of creep and its experimental verification, 365
Bluffing in animal contests, the evolution of; an ESS approach, 235
BODNAR, J. W., JONES, G. S. and ELLIS, JR., C. H., The domain model for eukaryotic DNA organization 2: A molecular basis for constraints on development and evolution, 281
Branches, bryozoan, splitting of cell clusters and bifurcation of, 271
BRITTON, N. F. and SKEVINGTON, S. M., A mathematical model of the gate control theory of pain, 91
Bryozoan branches, splitting of cell clusters and bifurcation of, 271
BUKHAROV, I. B. (see KHANIN, M. A.), 91
BULLIMAN, B. T. (see MENDZ, G. L.), 55

Cell, bioelectrorheological model of; analysis of stresses and deformation, 321
Cell, bioelectrorheological model of; analysis of creep and its experimental verification, 365
Cell cluster splitting and bifurcation of bryozoan branches, 271
Cell electrophoresis, implications of conformation of surface bound polyelectrolytes, 71
Cell, model, magnetic potential and field gradients of, 55
Conformation of surface bound polyelectrolytes; implications for cell electrophoresis, 71
Conformational changes, substrate-mediated, space-filling effects of inert solutes as probes for detection and study by enzyme kinetics; theoretical considerations, 171
Constraint matching as a means of designing biochemical experiments in multienzyme systems, 221
Contests, animal, the evolution of bluffing in; an ESS approach, 235
Contests, state-dependent, for food, 457
Copper(I) (1,10-phenanthroline)$_2$, DNA cleavage reagent, an intercalative and minor groove binding model for, 107
Coupling, mechanochemical, in eukaryotic flagella, 163
Creep: analysis and experimental verification in bioelectrorheological model of the cell, 365
Cultural transmission, oblique and horizontal; behavioral evolution and biocultural games, 245
CUMMINGS, F. W., On surface geometry coupled to morphogen, 215

Development and evolution, a molecular basis for constraints on; the domain model for eukaryotic DNA organization, 281
Development, wavelike isomorphic prepatterns in, 127
DNA cleavage reagent, copper(I) (1, 10-phenanthroline)$_2$; an intercalative and minor groove binding model, 107
DNA, eukaryotic, organization, the domain model for; a molecular basis for constraints on development and evolution, 281

Electrophoresis, cell; implications of conformation of surface bound polyelectrolytes, 71
ELLIS, JR., C. H. (see BODNAR, J. W.), 281
Enzyme kinetics, space-filling effects of inert solutes as probes for the detection and study of substrate-mediated conformational changes by; theory, 171
Enzymes: constraint matching as a means of designing biochemical experiments in multi-enzyme systems, 221
Enzymes, electrogenic: kinetic model of their effects on the membrane potential, 113
Error thresholds of replication in finite populations; mutation frequencies and the onset of Muller's ratchet, 375
Eukaryotic DNA organization, domain model; molecular basis for constraints on development and evolution, 281
Eukaryotic flagella, mechanochemical coupling in, 163
Evolution, behavioral, and biocultural games: oblique and horizontal cultural transmission, 245
Evolution of bluffing in animal contests: an ESS approach, 235
Evolution and development, a molecular basis for constraints on; the domain model for eukaryotic DNA organization, 281
Evolution of nuclear pre-mRNA introns, a general model for, 41
Evolution of reciprocity, oscillations in, 21
Exercise functional state of the oxygen transport system, a mathematical model, 191

FIKUS, M. and PAWLOWSKI, P., Bioelectrorheological model of the cell. 2. Analysis of creep and its experimental verification, 365
FIKUS, M. (see PAWLOWSKI, P.), 321
FINDLAY, C. S., HANSELL, R. I. C. and LUMSDEN, C. J., Behavioral evolution and biocultural games: oblique and horizontal cultural transmission, 245
Flagella, eukaryotic, mechanochemical coupling in, 163
Food, state-dependent contests for, 457

GARDNER, R. and MORRIS, M. R., The evolution of bluffing in animal contests: an ESS approach, 235
GARFINKEL, D., Constraint matching as a means of designing biochemical experiments in multi-enzyme systems, 221
Gate control theory of pain, a mathematical model, 91
GOLDWASSER, L., MAINI, P. K. and MURRAY, J. D., Splitting of cell clusters and bifurcation of bryozoan branches, 271
Growth tempo and sex differentiation in mammals; probabilities and switches, 445
GYÖRGYI, S. (see SMELLER, L.), 203

HANSELL, R. I. C. (see FINDLAY, C. S.), 245
HERNANDEZ, J., FISCHBARG, J. and LIEBOVICH, L. S., Kinetic model of the effects of electrogenic enzymes on the membrane potential, 113
HICKEY, D. A., BENKEL, B. F. and ABUKASHAWA, S. M., A general model for the evolution of nuclear pre-mRNA introns, 41
HOUSTON, A. I. (see MCNAMARA, J. M.), 457
HSU, J.-P. and TSENG, S., Estimating the adjustable parameters of the double Michaelis-Menten model, 355

Information, simulated navigation based on unreliable sources of; pigeon homing, 1
Intercalative and minor groove binding model for the DNA cleavage reagent, copper(I) (1,01-phenanthroline)$_2$, 107
Introns, pre-mRNA, nuclear, a general model for the evolution of, 41

JAMES, N. L. (see MENDZ, G. L.), 55
JONES, G. S. (see BODNAR, J. W.), 281
Juvenile period in age-structured populations, stability effects of, 397

KACSER, H. (see ACERENZA, L.), 423
KHANIN, M. A. and BUKHAROV, I. B., A mathematical model of the exercise functional state of the oxygen transport system, 191
Kinetic model of the effects of electrogenic enzymes on the membrane potential, 113
KUCHEL, P. W. (see MENDZ, G. L.), 55

Lecithin membranes, a statistical mechanical model of the pre- and subtransitions of, 203
LIEBOVITCH, L. S. (see HERNANDEZ, J.), 113
LUMSDEN, C. J. (see FINDLAY, C. S.), 245

MCNAIR, J. N., Stability effects of a juvenile period in age-structured populations, 397
MCNAMARA, J. M. and HOUSTON, A. I., State-dependent contests for food, 457
Magnetic potential and field gradients of a model cell, 55
MAINI, P. K. (see GOLDWASSER, L.), 271
Mammals, sex differentiation and tempo of growth; probabilities vs. switches, 445
Mechanochemical coupling in eukaryotic flagella, 163
Membrane potential, kinetic models of the effects of electrogenic enzymes on, 113
Membranes, lecithin, a statistical mechanical model of the pre- and subtransitive of, 203
MENDZ, G. L., BULLIMAN, B. T., JAMES, N. L. and KUCHEL, P. W., Magnetic potential and field gradients of a model cell, 55
Metabolic systems, time-dependent, control analysis of, 423
Michaelis–Menten model, estimating the adjustable parameters of, 355
MIKLAVIC, S. J. and NINHAM, B. W., Conformation of surface bound polyelectrolytes: I. Implications for cell electrophoresis, 71
MITTWOCH, U., Sex differentiation in mammals and tempo of growth: probabilities vs. switches, 445
Molecular basis for constraints on development and evolution; the domain model for eukaryotic DNA organization, 281
Morphogen, on surface geometry coupled to, 215
MORRIS, M. R. (see GARDNER, R.), 235
Muller's ratchet onset; error thresholds of replication in finite populations, 375
MURRAY, J. D. (see GOLDWASSER, L.), 271
Mutation frequencies and the onset of Muller's ratchet; error thresholds of replication in finite populations, 375

NAGORCKA, B. N., Wavelike isomorphic prepatterns in development, 127
Navigation, simulated, based on unreliable sources of information; models on pigeon homing, 1
NINHAM, B. W. (see MIKLAVIC, S. J.), 71
NOWAK, M. and SCHUSTER, P., Error thresholds of replication in finite populations. Mutation frequencies and the onset of Muller's ratchet, 375
NOWAK, M. and SIGMUND, K., Oscillations in the evolution of reciprocity, 21
Nuclear pre-mRNA introns, a general model for the evolution of, 41

OMOTO, C. K., Mechanochemical coupling in eukaryotic flagella, 163
Oscillations in the evolution of reciprocity, 21
Oxygen transport system, a mathematical model of the exercise functional state of, 191

Pain, a mathematical model of the gate control theory of, 91
PAWLOWSKI, P. and FIKUS, M., Bioelectrorheological model of the cell 1. Analysis of stresses and deformations, 321
PAWLOWSKI, P. (see FIKUS, M.), 365
Pharmacological stimulus-response model, isobolic determination of "ratio-linear" parameters in, 481
Pigeon homing models; simulated navigation based on unreliable sources of information, 1
Polyelectrolytes, surface bound, conformation of; implications for cell electrophoresis, 71
Populations, age-structured, stability effects of a juvenile period in, 397
Populations, finite, error thresholds of replication in; mutation frequencies and the onset of Muller's ratchet, 375
Prepatterns, isomorphic, wavelike, in development, 127

"Ratio-linear" parameters in pharmacological stimulus-response models, isobolic determination of, 481
Reciprocity, oscillations in the evolution of, 21
Replication error thresholds in finite populations; mutation frequencies and the onset of Muller's ratchet, 175
Resistivity, axial, locally altered, theoretical response of a bifurcating axon with, 339

SAURO, H. M. (see ACERENZA, L.), 423
SCHUSTER, P. (see NOWAK, M.), 375
Sex differentiation in mammals and tempo of growth: probabilities vs. switches, 445
SIGMUND, K. (see NOWAK, M.), 21
SKEVINGTON, S. M. (see BRITTON, N. F.), 91
SMELLER, L. and GYÖRGYI, S., A statistical mechanical model of the pre- and subtransitions of lecithin membranes, 203
Space-filling effects of insert solutes as probes for the detection and study of substrate-mediated conformation changes by enzyme kinetics: theoretical considerations, 171
Stability effects of a juvenile period in age-structured populations, 397
State-dependent contests for food, 457
Statistical mechanical model of the pre- and subtransitions of lecithin membranes, 203
Stimulus-response models, pharmacological, isobolic determination of "ratio-linear" parameters in, 481
STOCKBRIDGE, N., Theoretical response of a bifurcating axon with a locally altered axial resistivity, 339
